## **CARCLUB 1 AMP PRECISE CHARGER**

This product is designed to give a 1 amp maximum 13.9 V precise voltage & current limit suitable for charging 12 volt nominal lead acid cells. When it reaches this accurate set point, the charger supplies a small trickle charge to maintain the battery. For sealed batteries, there can be no venting, as the current is precisely limited. For open cells, there is no out gassing. Therefore the charger cannot damage the battery.

Input : Safety Approved plug pack,

No RFI: No Radio Interference generated. Linear technology

Indicator LEDS to show state of charge

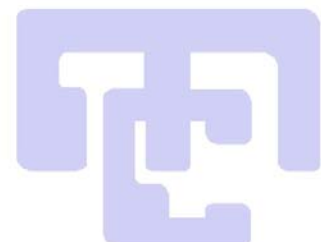

13.9 V nominal output at 1 amps constant current limit

Can be shorted out without damage and is reverse polarity protected.

Available with your logo.
